

For the last 6 years Mars ILL has been putting out records utilizing almost all in-house skills and talents. Of course rhyming, producing as well as recording, mixing, designing and the latest, music video production.

Mars ILL has truly made an effort to embody the idea of being independent. Now after working out all the bugs over the last 6 years they are opening the doors of our little creation cave " Mother of Invention Studio". You can do just about anything there, go to <a href="https://www.motherofinventionstudio.com">www.motherofinventionstudio.com</a>

to take a closer look at all of their work to date. The site includes pics of the recording studio (as well as the attached suite for extended stays) design portfolio, music portfolio, a list of our gear of choice, 2 videos they've directed and edited and more.
